To Whom It May Concern,

Subject: Letter of Recommendation for Xiaomin Guo

I'm pleased to recommend Xiaomin Guo. I taught her in full-stack web development and AI integration, where she stood out for her intellectual curiosity, technical maturity, and thoughtful approach to system architecture, safety, and user-centered design.

Her greatest strength is systems thinking. For one of her projects, Xiaomin used a sophisticated multi-agent AI framework with specialized agents for mentoring, planning, retrieval, analysis, and coordination. What impressed me most was her architectural depth, especially how she incorporated distributed design, structured communication, confidence scoring, and transparent synthesis.

Beyond the technical work, Xiaomin explains complex ideas clearly and writes excellent, implementation-focused documentation. She's also committed to responsible AI, always prioritizing safety, academic integrity, and grounded retrieval.

Xiaomin is ready for any advanced role in AI or software development. I recommend her without hesitation.

Feel free to reach out if you'd like more details.

Sincerely,

Brian Hu
Adjunct Professor
