Letter of Recommendation

From Jin Li <jli329@my.centennialcollege.ca>

Date Mon 5/11/2026 4:56 PM

To Xiaomin Guo <xguo51@my.centennialcollege.ca>

May 11, 2026

To Whom It May Concern,

It is my distinct pleasure to recommend Xiaomin (Aileen) Guo for a software developer position at your organization. As her Professor and Supervisor during the Senior Capstone Project at Centennial College, I have had the opportunity to observe her technical prowess, intellectual curiosity, and professional growth firsthand.

Xiaomin stood out early in the semester as one of the most capable students in a cohort of highly motivated engineers. For her capstone project, she took a lead role in developing AI powered listening companion, a complex full-stack application. What impressed me most was her architectural intuition. She didn't just write code; she designed systems that were scalable, maintainable, and robust. She demonstrated a deep understanding of how front-end interfaces interact with back-end services, ensuring seamless data flow and optimized performance.

Technically, Xiaomin is a versatile developer. Her coding skills are exemplary, characterized by a commitment to "clean code" principles and thorough documentation. Whether she was implementing complex API logic or crafting responsive, user-centric front-end components, her work consistently exceeded the project requirements. She is an inquisitive learner who never settles for a surface-level understanding of a problem; when faced with a bug or a new technology, she dives deep until she masters the underlying mechanics.

Beyond her technical skills, Xiaomin is a collaborative team player with excellent communication skills. She was often the person her peers turned to for guidance on debugging or architectural decisions. Her proactive approach and "can-do" attitude make her an asset to any development team, particularly in fast-paced environments where adaptability is key.

In conclusion, Xiaomin possesses the technical foundation, the meticulous attention to detail, and the inquisitive mindset required to excel as a software developer. I recommend her without reservation and am confident she will make a significant contribution to your engineering team.

Sincerely,

Jin Li

Professor, Software and Information Technology Department
Centennial College
